## WELDING & FABRICATION

With all the technology available, the need for highly skilled tradesmen is still critical to the completion of quality custom components. If your parts require MIG or TIG welding, riveting, sanding or polishing, we have the capability to fabricate your product, regardless if it's mild steel, stainless steel or aluminium.

### Welding & Fabrication Specifications

- Mig welding up to 400 amps
- Tig welding up to 220 amps
- Prototyping to production capacity
- General Fabrication

### Total Project Management

From concept to completion, we can provide you with a total project management solution.

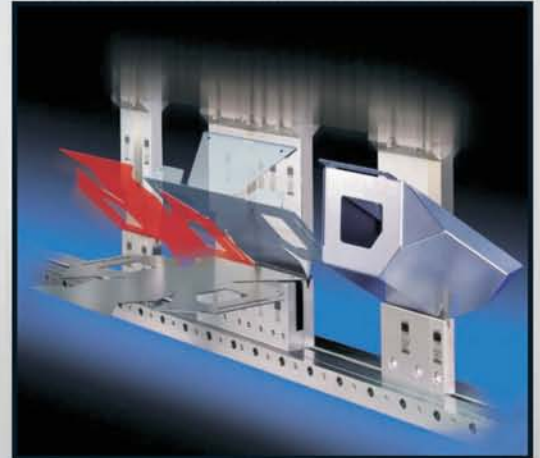

### Assembly and Finishing

As part of our complete fabrication service, we have the capability of offering finishing services from powder coating to zinc plating, electro polishing to assembly. If you have specific packaging or bar-coding needs, we will work with you to ensure we meet the requirements of your business.

### Assembly and finishing services

- Powder coating
- Plating
- Polishing
- Assembly
